

## **Position**

Integration Engineer

## **Description**

inStream Media is a dynamic, growing venture backed company in Newton, MA. We provide targeted advertising and promotions to customers at the point of sale. See [www.instreamglobal.com](http://www.instreamglobal.com) for more information about the company. We are looking for talented integration engineers to join our team and work with our growing list of retail partners to expand our advertising network.

## **Responsibilities**

You are a smart, top notch software engineer who will design and build technology to integrate our retail partners' systems with our Ad Server and Ad Management technology. You will work directly with our clients to define, document and build integration solutions.

## **Requirements**

- BS or MS in Computer Science or equivalent
- 3+ years development experience in a production environment
- Familiarity with network protocols (HTTPS, SFTP, SSH, SMTP)
- Strong understanding of Linux command line and tools
- Strong scripting skills in at least one common language (Perl, Bash)
- Good coding skills in Java
- Working knowledge of RDBMS, ANSI SQL, MySQL experience a plus
- XML technologies
- Strong analytical / problem solving skills
- Able to work with a high level of initiative, accuracy and attention to detail
- Excellent verbal and written communication skills
