

Position

Software Engineer

Description

inStream Media is a dynamic, growing venture backed company in Newton, MA. We provide targeted advertising and promotions to customers at the point of sale. See www.instreamglobal.com for more information about the company. We are looking for talented software engineers to join our team and expand our suite of software technologies that support our retailer and advertising network.

Responsibilities

You are a smart, top notch software developer who will do design and development work on our Ad Server technology as well as our Ad Management system. You will work cross functionally with sales and marketing as well as our off shore development resources to define system requirements.

Requirements

- BS or MS in Computer Science or equivalent
- 5+ years development experience in a production environment
- Background in object oriented design and analysis
- Excellent coding skills in Java
- Strong scripting skills in at least one common language (Perl, Shell)
- Familiarity with web technologies (DHMTL, AJAX, JavaScript)
- Proficiency with JUnit or other unit testing frameworks
- Working knowledge of RDBMS, ANSI SQL, MySQL experience a plus
- XML technologies
- Object Relational Mapping technologies (Hibernate)
- Solid understanding of n-tier application architecture
- Strong analytical / problem solving skills
- Able to work with a high level of initiative, accuracy and attention to detail
- Excellent verbal and written communication skills
